

NUMS SCHOOL OF ALLIED HEALTH SCIENCES (AHS)

Preamble

The NUMS School of Allied Health Sciences (AHS) is a constituent institution of NUMS, specialized in providing Allied Health Sciences programs under AHPC as well as TVET courses.

The school was officially established in August 2023 following approval from the NUMS Syndicate during the 28th Academic Council Meeting.

Location:

The AHS is currently located in NUMS Campus Islamabad, with plans for shifting to King Hamad University of Nursing and Associated Medical Sciences Chak Shehzad Islamabad upon its operationalization.

Course Programs:

- **Bachelor Programs:**

BS Emergency and Clinical Medicine Technology (AHPC)

- **Certificate Programs:**

Certificate in Care Assistant (TVET)

BS Emergency and Clinical Medicine Technology

NUMS School of Allied Health Sciences proudly introduces the Bachelor of Science (BS) program in Emergency and Clinical Medicine Technology, a forward-thinking initiative designed to meet the demands of contemporary healthcare and align with global standards. By incorporating cutting-edge technologies and practices, the program aims to enhance the quality and efficiency of healthcare delivery.

Our interim campus at NUMS Campus serves as the initial venue for the BS Emergency and Clinical Medicine classes. The program will benefit from the collaboration with renowned teaching hospitals, PEMH and CMH Rawalpindi, ensuring that students receive hands-on training in state-of-the-art medical settings.

Certificate in Care Assistant

NUMS School of Allied Health Sciences introduces the Certificate in Care Assistant, a meticulously crafted training program aimed at equipping individuals with the essential knowledge and practical skills necessary for delivering high-quality care in home settings.

This comprehensive course is designed to address the growing need for home healthcare services driven by an aging population, chronic diseases, and post-hospitalization care requirements. With a focus on providing exceptional care and support to the elderly and individuals with chronic illnesses or disabilities, the program emphasizes both the technical competencies and the compassionate approach needed for effective caregiving.

The Certificate in Care Assistant program spans six months and is offered twice a year, ensuring that students receive rigorous training in a range of vital areas, including personal care, emergency healthcare, nutrition, and communication. Students will engage in hands-on practice both in clinical settings and home environments, preparing them to assume meaningful roles in various healthcare contexts such as private home care, nursing homes, and community health centers.
