Allied Health Sciences

Syllabus / TOS for Entry Test

FSc – Pre Medical Equivalent Students

As per NUMS undergraduate Academic Policy "For admission in BS (MLT), BS(MIT) and BS (CP) student will have to go through the mandatory entry test of the university, keeping with the common topics of F. Sc / A Level syllabus covering following four subjects"

S#	Subjects	Syllabus Cover
1	Biology	40 %
2	Chemistry	30%
3	Physics	20%
4	English	10%

Sr. No	Table of Contents	Subject
31.110		Biology
1.	The Cell	Light and Electron Microscope (Magnification and Resolution). Structure of Typical Animal and Plant Cell. Fluid Mosaic Model of Cell Membrane. Transport of Material across the Cell Membrane: Active transport, Passive transport, Endocytosis and Exocytosis. Eukaryotic Cell Structures: Endoplasmic reticulum (RER & SER), Ribosomes, Golgi apparatus, Lysosomes, Vacuoles, Centrioles & Microtubules, Mitochondria, Chloroplast and Nucleus (nuclear membrane, nucleolus and chromosomes).
2.	Biological Molecules	Carbohydrates: Monosaccharides, Disaccharides and Polysaccharides (Starch, Glycogen & Cellulose). Lipids: Triglycerides, Phospholipids and their functions. Proteins: Amino Acids & Peptide bond formation, Structures of Proteins (primary, secondary, tertiary and quaternary structures) and Globular & Fibrous Proteins. Nucleic acids: DNA, RNA and Types of RNA. Water: Heat of vaporization, Specific Heat Capacity and Solvent Action. Enzyme: Definition, Characteristics of, Mechanism of Enzyme Action Enzymes (Lock & key model and Induced fit model), Factors affecting the rate of Enzyme Action, Inhibitors
3.	Chromosomes and DNA	Chromosome: Nucleosome, DNA, Histone Proteins, Chromatids, Centromere and Telomeres. Gene as a Basic Unit of Genetic Information. DNA Replication: Hypothesis of DNA Replication, Meselson & Stahl's experiment and Replication. Transcription. Genetic Code. Translation

		Cell Cycle: Interphase (G1, S and G2 phases), Mitotic
4.	Cell Division	phase and Cytokinesis. Mitosis: Process of Mitosis, Significance of Mitosis.
		Meiosis: Process of Meiosis and Significance of Meiosis.
		Kingdoms: Protoctista, Fungi, Plantae and Animalia.
5,	Variety of Life	Viruses: Structure of Viruses.
		AIDS: Causative Agent, Modes of Transmission and
		Prevention & Control.
		Photosynthetic Pigments (Chlorophylls and Carotenoids). Absorption and Action Spectra.
		Light-Dependent Reactions (cyclic and non-cyclic phosphorylation) and Light-Independent Reactions
6.	Diagramatica	(Calvin cycle).
0.	Bioenergetics	Cellular Respiration: Glycolysis, Link reaction / Pyruvic
		Oxidation, Kreb's Cycle (with reference to production of
		NADH, FADH and ATP) and ETC.
		Anaerobic Respiration and its Types (Alcoholic and
		Lactic Acid Fermentation).
		Anatomy of Human Respiratory System.
7.	Cas Evahanas	Transport of Respiratory Gases: O2 & CO2 and Role of
7.	Gas Exchange	Haemoglobin as Respiratory Pigment.
		Respiratory Disorders: Tuberculosis, Emphysema and
		Lung Cancer.
		Transport of Water and Minerals: Apoplast & Symplast Pathway and Cohesion, Transpiration Pull / Tension &
		Adhesion.
8.	Transport in Plants	Transpiration, Factors affecting it and opening and
	3,000 - 1 ,000 m, 000	closing of Stomata.
		Translocation according to Pressure Flow Theory.
		Xerophytes.
		Heart: Structure of heart, Cardiac Cycle, Control of Heart
		Beat, ECG and Blood Pressure.
9.	Transport in Human	Blood Vessels: Arteries, Veins and Capillaries.
		Blood: Plasma and Blood Cells (RBCs, WBCs and
		platelets).
		Lymphatic System.
10	Manager and Audi	Immune System and its Components. Types of Immunity.
10.	Immunity	
		Vaccination.
	Homeostasis	Homeostasis.
11.		Thermoregulation in Mammals.
		Human Urinary System.
No. One.		Structure and Function of Skeletal Muscle.
12.	Muscles and Movement	Mechanism of Skeletal Muscle Contraction; Sarcomere,
		Ultrastructure of Myofilaments, Sliding Filament,

	Control of Actin-Myosin Interaction and Use of Energy for Muscle Contraction.
	Nervous Coordination in Mammals. Neurons: Sensory, Intermediate / relay and motor neurons. Reflex arc / Reflex action.
	Nerve impulse.
Communication	Synapse.
	Hormones: Definition & Types of Hormones, Hormones of Islets of Langerhans (Insulin & Glucagon) and Role of ADH in Osmoregulation.
	Plants Hormones: Auxins, Gibberellins and Abscisic
Reproduction	Acid. Gametogenesis: Spermatogenesis and Oogenesis. Hormonal control of Human Menstrual Cycle (FSH, LH,
	estrogen and progesterone). Basics of Genetics: Gene, Locus, Allele, Gene Pool, Phenotype, Genotype, Homozygous, Heterozygous, Dominant Allele, Recessive Allele, Complete
Genetics	Dominance, Codominance, Linkage, F ₁ & F ₂ Generations, Mutation and Multiple Allele.
	Gene Linkage: Crossing over and Recombination Frequency / Cross Over Value.
	Continuous and Discontinuous Variations.
	Punnet square, Test cross and Monohybrid & Dihybrid Crosses.
	Gene Linkage and Sex Linkage in Human (Haemophilia and Colour Blindness).
Biotechnology	Recombinant DNA Technology / Genetic Engineering: Principles of Recombinant DNA Technology and its Application, PCR & Gel Electrophoresis and DNA Analysis / Finger Printing. Gene Therapy.
	Transgenic Organisms (Bacteria, Plants and Animals).
Evolution	Theory of natural selection. Hardy-Weinberg theorem and factors affecting gene / allele frequency.
	Chemistry
	Relative masses. Isotopes. Mole.
Fundamental Concepts	Avogadro's number. Empirical and Molecular formulae. Stoichiometric Calculations.
	Reproduction Genetics Biotechnology Evolution

		District Annual Manager Britain
		Percentage composition
		Molarity
		Mole fraction Gaseous state.
		THE TAX AND THE PROPERTY OF THE PARTY OF THE
		General Gas Equation (PV=n RT).
		Liquid state:
2.	States of Matter	Evaporation
		Vapor pressure
		Boiling
		Structure of ice
<u>. </u>		Lattice structure of a crystalline solid
		Proton, Neutron and Electron.
		Distribution of Mass and charges.
		Deduce the number of protons, neutrons and electrons
3.	Atomic Structure	from given proton number and nucleon number.
		Shape of s, p and d- Orbitals.
		Electronic configuration.
		Ionization energy.
1-	-	Electron affinity.
		Ionic (Electrovalent) bond
		Use the "dot and cross" model for:
		Covalent bonding
		Co-ordinate (dative covalent) bonding
4.	Chamical Bandina	Shapes and Bond Angles of molecules.
***	Chemical Bonding	Covalent Bonding.
		Bond Energy, Bond length and bond Polarity
		(Electronegativity difference).
		Intermolecular Forces (especially Hydrogen Bonding).
		Interpret and predict the effect of different types of
		bonding on physical properties of substances. Concept of Energy changes during Chemical reactions.
		Use the terms:
		Enthalpy change of reaction
5.	Chemical Energetics	Bond energy
		Numerical Magnitude of Lattice Energy.
		Hess's law to construct simple energy cycles.
		Redox processes.
		Oxidation numbers of Elements.
		Balancing chemical equations by redox method.
	Electrochemistry	Standard electrode (redox) Potential.
6.		Standard Hydrogen Electrode.
		Methods used to measure the standard Electrode
		potentials of metals.
		Standard Cell Potential.
		Electrode Potential.

Construct Redox equations. Advantages of Developing the H ₂ /O ₂ fuel cell. Rates of forward and reverse Reactions and Dyn Equilibrium. Le- Chatelier's Principle. Deduce expression for Equilibrium constant. Calculate the values of Equilibrium constants. Calculate the equilibrium quantities.	
Rates of forward and reverse Reactions and Dyn Equilibrium. Le- Chatelier's Principle. Deduce expression for Equilibrium constant. Calculate the values of Equilibrium constants.	
Equilibrium. Le- Chatelier's Principle. Deduce expression for Equilibrium constant. Calculate the values of Equilibrium constants. Calculate the equilibrium quantities	amic
Deduce expression for Equilibrium constant. Calculate the values of Equilibrium constants. Calculate the equilibrium quantities	1000
Calculate the values of Equilibrium constants.	
Calculate the equilibrium quantities	
Calculate the equilibrium quantities	
Conditions used in Haber process.	
Qualitatively the differences in behavior of stror acids and bases.	ng/weak
Terms: pH, K _a , pK _a , K _b , pK _b , K _w and K _{sp} .	
[H ⁺ (aq)], [OH ⁻ (aq)], pH and pOH values for streward acids and bases.	ong and
Rate of Reaction, Activation Energy, Catalysis,	Rate
Equation, Order of Reaction, Rate Constant.	
Collisions.	
Enzymes as Biological Catalysts.	
Construct and use rate equations with special em	phasis
Reaction Kinetics/	To diffusion
8. Chemical Kinetics • Zero order reaction	
1st order reaction	
2nd order reaction	
Half-life of a first order Reaction.	
Calculate the order of reaction.	
Calculate the rate constant.	
Name a Suitable method for studying the rate of	a
Reaction.	No. 2011
Inorganic Chemistry	
Variation in the Physical properties of Elements	
Belonging to period 2 and period 3: a. Atomic Radius	
b. Ionic Radius	
c. Melting Point	
d. Boiling Point	
e. Ionization Energy	
1. Periods f. Electronegativity	
g. Electron Affinity	
h. Electrical Conductivity	
i. Oxidation States	
j. Hydration Energy	
Periodic Relationship in Binary compounds:	
k. Halides (especially chlorides)	
I. Oxides	

-		
		The variation in the properties of group II and VII Elements:
		 Reactions of group II elements.
		b. Thermal decomposition and solubility of
2.	Groups	compounds of group II elements
		c. Properties of Halogens and their compounds
		d. Reaction of Chlorine
		e. Comparison of Oxidizing power of halogens
		f. Uses of Halogens and compounds of Halogens
		Chemistry of Transition Elements of 3d series:
		a. Electronic Configuration
		 b. Variable Oxidation states
3.	Transition Elements	c. Uses as a Catalyst
3.	Transition Elements	d. Formation of Complexes
		e. Colour of Transition Metal Complexes
		f. Geometry and isomerism of complex ions with
		coordination number 4 and 6.
		Nitrogenous fertilizers.
4.	Compounds of Nitrogen	Presence of Sulphur Dioxide in atmosphere.
714	and Sulphur	Manufacturing of Sulphuric Acid.
Jeros - Arrende de La		Sulphuric acid as dehydrating agent and oxidizing agent.
	Org	anic Chemistry
		The Organic compounds.
		Alkanes and Alkenes of lower masses.
1.		Nucleophiles, electrophiles and free radicals.
	Fundamental Principles	Isomerism.
		Functional group and Nomenclature of organic
		compounds.
		Chemistry of Alkanes with emphasis on:
		Combustion.
		 The Mechanism of free radical Substitution
		reaction.
		Chemistry of Alkenes with emphasis on:
		 Preparation of Alkenes
		Reaction of Alkenes
2.	Hadacoak	Chemistry of Benzene
4.	Hydrocarbon	Benzene.
		 Electrophilic substitution reactions and the
		mechanism.
		Hydrogenation of Benzene ring.
		Side chain Oxidation of Methyl Benzene (Toluene) and Ethyl Benzene
		(Toluene) and Ethyl Benzene.
		Benzene ring by 2,4 Directing and 3,5 directing
	411	groups.
2		
3.	Alkyl Halides (Halogenoalkanes)	Importance of Halogenoalkanes. Reaction of Alkyl Halides:

4.	Alcohols and Phenois	Alcohols with reference to: Alcohols: Primary, Secondary and Tertiary. Preparation of Ethanol. Reactions of Alcohols. Phenols Reactions of Phenol Acidity of Water, ethanol and phenol
5.	Aldehydes and Ketones	Structure of Aldehydes and Ketones. Preparation of Aldehydes and Ketones. Reactions of Aldehydes and Ketones: Nucleophilic addition reaction mechanism
6.	Carboxylie Acid	Physical properties of carboxylic acids. Reactions of carboxylic acids. Relative Acidic strength.
7.	Amino Acids	General Structure of -Amino Acids found in Proteins. Amino Acids on the basis of Nature of R-group. Zwitter Ion. Acid base properties of Amino Acids. Peptide bond formation.
8.	Macromolecules	Addition polymerization. Conensation polymerization. Structure of Proteins. Structure and function of Nucleic acid (DNA).
9.	Environmental Chemistry	Air Pollutants. Chemistry and causes of Acid Rain. Ozone and Chlorofluorocarbons (CFCs).
		Physics
1.	Measurement	Physical quantities, numerical magnitude and a proper unit. International System of Units, SI base units of physical quantities, and their derived units. Prefixes and symbols to indicate decimal, submultiples or multiples of both base and derived units: • Errors and uncertainties • Systematic error and random error. • Fractional uncertainty and percentage uncertainty. Assessment of total uncertainty in the final results (Understanding of total assessment about addition and subtraction, multiplication and division & power factor).
2.	Motion And Force	Displacement, Distance, Speed, Velocity and Acceleration. Velocity–Time Graph. Equations of motion. Newton's Laws of Motion.

		Momentum and law of conservation of momentum.
		Force and rate of change of momentum.
		Impulse and $I = F \times t = mv_f - mv_i$
		Elastic and in-elastic collisions
		Projectile Motion and its applications.
		Moment of force or torque and use of torque.
		Equilibrium.
		Work in terms of the product of a force and displacement in the direction of the force.
		Kinetic energy K.E = $\frac{1}{2}$ mv ²
3.	Work, Energy and	Potential energy P.E = mgh.
٥.	Power	Inter-conversion of kinetic energy and potential energy in gravitational field.
		Power in terms of work done per unit time and use power W
		as product of force and velocity $P = t$ and $P = Fv$.
		Angular motion, angular displacement & angular
		velocity.
- air		Centripetal Force and centripetal acceleration.
4.	Circular Motion	$F = mr^2 \omega$, $F = \frac{mv^2}{r}$ and $a_c = r\omega^2$ and $a_c = \frac{v^2}{r}$
		Geostationary orbits.
		Radian.
		Simple harmonic motion
		Amplitude, Frequency, Angular Frequency, Phase
		Difference. Express the time period in terms of both
		frequency and angular frequency.
		Equations $x = x_0 sin\omega t$, $v = v_0 cos\omega t$, $v =$
5.	Oscillations	$\pm \omega \sqrt{x_0^2 - x^2}$, $a = -\omega^2 x$ and its use.
	o some some	Motion of simple pendulum and relation.
		Kinetic energy and potential energy during Simple harmonic motion.
		Free, Forced and Damped Oscillations. Resonance.
		Progressive waves
		Transverse and longitudinal waves.
	Ser.	Principle of superposition.
6.	Waves	Stationary waves and wavelength of sound waves in air
		columns and stretched strings.
		Doppler's Effect
		Electromagnetic Spectrum.
		Interference of light waves, constructive and destructive
_	mil or or	interference.
7.	Light	Young's Double Slit experiment, fringe spacing, dark and
		bright fringes.
	[Diffraction (basic principle).

8. Heat & Thermodynamics Pressure exerted by a gas and derive the relation $PV = \frac{Nm}{3} < \frac{v^2}{2} > \frac{Equation of state for an ideal gas as PV = nRT PV = \frac{Nm}{3} < v^2 > and PV = NkT and prove that K.E. \alpha T for a single molecule. Internal Energy. Specific Heat capacity. Coulomb's Law. $			Diffraction grating.
8. Heat & Thermodynamics $\frac{V^2 > }{3} < \frac{V^2 > }$			The state of the s
8. Heat & Thermodynamics			Pressure exerted by a gas and derive the relation $PV = \frac{Nm}{3}$
PV = $\frac{Nm}{3} < v^2 > \text{ and PV} = \text{NkT and prove that K.E } \propto \text{T for a single molecule.}$ Internal Energy. Specific Heat capacity. Coulomb's Law. Electric field strength. $E = \frac{\Delta V}{\Delta d}$ to calculate the field strength. Electric field lines. $E = \frac{Q}{4\pi\epsilon_0 r^2}$ Gravitational force and electric force. Electric potential Capacitance of a capacitor Energy stored in capacitor Current. Ohm's Law. Series and parallel Combination of resistors. Resistance and resistivity. Potential difference and e.m.f. Power dissipation in resistors. Kirchhoff's First Law as conservation of charge. Kirchhoff's First Law as conservation of energy. Potentiometer. Magnetic field. Force on current carrying conductor in uniform magnetic field. Motion of charge particle in uniform electric and magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. Force on a moving charge in magnetic field. Magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. Force on a moving charge in magnetic field. Magnetic field. Force on a moving charge in magnetic field. Magnetic field. Force on a moving charge in magnetic field. Alternating current and use $V = V_0 \sin \omega t$ Transformer and uses of $\frac{N_0}{N_p} = \frac{V_0}{V_0} = \frac{V_0}{V_0}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.	8.	Heat & Thermodynamics	Equation of state for an ideal gas as $PV = nRT$
9. Electrostatics Electric field strength. $E = \frac{\Delta V}{\Delta d} \text{to calculate the field strength.}$ Electric field lines. $E = \frac{Q}{4\pi\varepsilon_0 r^2}$ Gravitational force and electric force. Electric potential Capacifance of a capacitor Energy stored in capacitor Current. Ohm's Law. Series and parallel Combination of resistors. Resistance and resistivity. Potential difference and e.m.f. Power dissipation in resistors. Kirchhoff's First Law as conservation of charge. Kirchhoff's Second Law as conservation of energy. Potentiometer. Magnetic field. Force on current carrying conductor in uniform magnetic field. Motion of charge particle in uniform electric and magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 \sin \omega t$ Transformer and uses of $\frac{N_0}{N_p} = \frac{V_0}{I_0} = \frac{V_0}{I_0}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.	٠,	reat & The modynamics	$PV = \frac{Nm}{3} < v^2 > \text{and PV} = \text{NkT}$ and prove that K.E \preceq T for a
9. Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use V = V ₀ sinωt Transformer and uses of N _p = V _p = V _p = V _p and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			
10. Current Electricity Resistance and resistivity. Potential difference and e.m.f. Power dissipation in resistors. Kirchhoff's First Law as conservation of charge. Kirchhoff's Second Law as conservation of energy. Potentiometer. Magnetic field. Force on current carrying conductor in uniform magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 sin\omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{I_p}{I_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			Ohm's Law.
Potential difference and e.m.f. Power dissipation in resistors. Kirchhoff's First Law as conservation of charge. Kirchhoff's Second Law as conservation of energy. Potentiometer. Magnetic field. Force on current carrying conductor in uniform magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 sin\omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{I_p}{I_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			Series and parallel Combination of resistors.
Potential difference and e.m.r. Power dissipation in resistors. Kirchhoff's First Law as conservation of charge. Kirchhoff's Second Law as conservation of energy. Potentiometer. Magnetic field. Force on current carrying conductor in uniform magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 sin\omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{I_p}{I_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.	10	Control Electrical	
Kirchhoff's First Law as conservation of charge. Kirchhoff's Second Law as conservation of energy. Potentiometer. Magnetic field. Force on current carrying conductor in uniform magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m. f and factors. Alternating current and use $V = V_0 \sin \omega t$ Transformer and uses of $\frac{N_S}{N_P} = \frac{V_S}{V_P} = \frac{l_P}{l_S}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.	10.	Current Electricity	
Kirchhoff's Second Law as conservation of energy. Potentiometer. Magnetic field. Force on current carrying conductor in uniform magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 sin\omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{I_p}{I_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			
Potentiometer. Magnetic field. Force on current carrying conductor in uniform magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 sin\omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{I_p}{I_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			
11. ELECTROMAGNETIS M Magnetic field. Force on current carrying conductor in uniform magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 \sin \omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{I_p}{I_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			
Force on current carrying conductor in uniform magnetic field. Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 sin\omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{I_p}{I_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			
11. ELECTROMAGNETIS M Force on a moving charge in magnetic field. Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 sin\omega t$ Transformer and uses of $\frac{N_S}{N_p} = \frac{V_S}{V_p} = \frac{I_p}{I_S}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			
Motion of charge particle in uniform electric and magnetic field. Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 sin\omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{I_p}{I_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			
Motion of charge particle in uniform electric and magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 \sin \omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{I_p}{I_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.	11.		Force on a moving charge in magnetic field.
magnetic field. e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 sin\omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{l_p}{l_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.		LyL	Motion of charge particle in uniform electric and
e/m for an electron. Magnetic flux. Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 \sin \omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{l_p}{l_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			
Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 \sin \omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{l_p}{l_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			e/m for an electron.
Faraday's Law and Lenz's Law. Induced e.m.f and factors. Alternating current and use $V = V_0 \sin \omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{l_p}{l_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			Magnetic flux.
12. Electromagnetic Induction Alternating current and use $V = V_0 sin\omega t$ Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{I_p}{I_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			Faraday's Law and Lenz's Law.
Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{l_p}{l_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.			Induced e.m.f and factors.
Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{l_p}{l_s}$ and practical transformer. Period, frequency, peak value and root mean square value of an alternating current or voltage.	12.		Alternating current and use $V = V_0 \sin \omega t$
Period, frequency, peak value and root mean square value of an alternating current or voltage.		Induction	Transformer and uses of $\frac{N_s}{N_p} = \frac{V_s}{V_p} = \frac{I_p}{I_s}$ and practical
value of an alternating current or voltage.			transformer.
			value of an alternating current or voltage
	13.	Deformation of Solids	Stress, strain and Young's Modulus.

		Tensile stress and strain.
		Hook's Law.
		Elastic and plastic deformation of a material.
		Strain energy.
ľ		Band Theory, valence band, conduction band and
		forbidden band.
		Half and Full wave rectification.
		Single diode for half wave rectification of an alternating
14.	Electronics	current.
14,	Electronics	Four diodes for full wave rectification of an alternating
		current.
		Operational amplifier and its characteristics.
		Energy of photon $E = hf$.
		Photoelectric Effect, Threshold Frequency and Work
		Function Energy.
		Maximum photoelectric energy is independent of
		intensity whereas photoelectric current is proportional to intensity.
		Einstein's Photoelectric equation
15.	Modern Physics	
	•	$hf = \emptyset + \frac{1}{2}mv_{max}^2.$
		de Broglie wavelength and use $\lambda = \frac{h}{p}$
		Discrete energy levels of hydrogen atom and spectral
		lines.
		Relation $hf = (E_2 - E_1)$
